

Standard Rig Safety System

Wireless Crown Saver

- Prevents traveling block from striking crown block
- Easy-to-install, rugged enclosure, wireless device
- Long battery life, 2+ years
- Reliable, fail-safe, and maintenance-free operation

Floor Saver

- Prevents traveling block from striking rig floor
- High-precision revolution encoder on the draw works
- Tracks and reports the moving block position
- Advanced calibration for accurate position tracking

Controller

- Activates throttle/speed control and brake outputs if the moving block exceeds a configured safe zone limit
- Safety control outputs can activate audible or visual alarms, many configuration options
- Expandable to add more zone management and safety monitoring functions, incl. wireless emergency switches, weight, pressure, angle conditions, activity data recording, wireless and remote monitoring

Safety and Efficiency
The Foundation of Everything We Do
