

# Safety System Bundles and Components Pricing

**Alert Systems  
International, Inc.**

*A basic safety system  
improving personnel safety  
and protecting your  
equipment.*

*A cost-effective, integrated  
safety system with advanced  
zone management, laser  
guided collision avoidance,  
weight monitoring, and all  
essential operator tools for  
uninterrupted productivity.*

*An intrinsically-safe,  
advanced safety system with  
intelligent redundancy for  
fault tolerance, remote  
status/alarm monitoring, two  
wireless emergency kill  
switches, and computer  
vision monitoring the  
operator's attention,  
delivering the highest level of  
safety assurance, efficiency,  
and productivity.*

| COMPONENT                      | UNIT MSRP | STANDARD RIG SAFETY SYSTEM | STANDARD PLUS RIG SAFETY SYSTEM | ADVANCED RIG SAFETY SYSTEM |
|--------------------------------|-----------|----------------------------|---------------------------------|----------------------------|
| System Controller              |           | ✓                          | ✓                               | ✓                          |
| Brake Control Module           |           | ✓                          | ✓                               | ✓                          |
| Wireless Crown Saver (Chain)   |           | ✓                          |                                 | ✓                          |
| Wired Crown Saver (LIDAR)      |           |                            | ✓                               | ✓                          |
| Wired Floor Saver (Encoder)    |           | ✓                          | ✓                               | ✓                          |
| Wired Status Lights & Siren    |           |                            | ✓                               | ✓                          |
| Load-cell & Gauge              |           |                            | ✓                               | ✓                          |
| Wireless Status Lights & Siren |           |                            |                                 | ✓                          |
| 2X Wireless Emergency Switch   |           |                            |                                 | ✓                          |
| Operator Alert System          |           |                            |                                 | ✓                          |
| Wireless Angle Monitor         |           |                            |                                 |                            |
| Top-drive Slew Monitor         |           |                            |                                 |                            |
| Pressure Monitor               |           |                            |                                 |                            |
| Wind Speed Monitor             |           |                            |                                 |                            |
| B.O.P. RAM Monitor             |           |                            |                                 |                            |
|                                |           |                            |                                 |                            |
|                                |           |                            |                                 |                            |
